

JONCO INDUSTRIES

3D Printing Services

Here at JONCO Industries, we have added another dimension to our prototyping services, with our Fortus 250mc 3D printer.

Able to print parts as big as 10 x 10 x 12 inches.

Accurate to a 0.007 inch layer resolution.

Parts are produced within an accuracy of +/- 0.0095 inches.

Printed with ABSplus Plastic, which is mechanically strong and durable.

Color options: ivory, white, black, dark grey, red, blue, olive green, nectarine and fluorescent yellow.

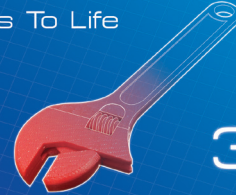

Able to print complex shapes with the assistance of soluble support material.

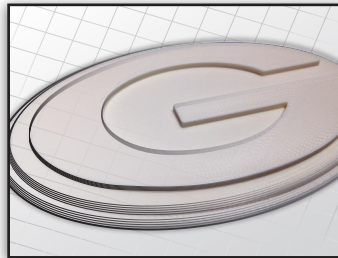

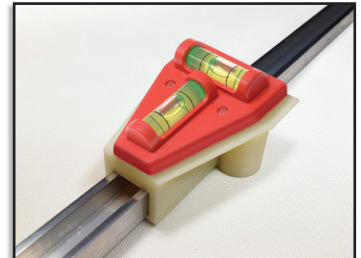

Uses STL files, but we can also set-up accurate digital models for printing.

JONCO's 3D printing service brings your ideas to life, but don't just stop at prototyping, expand beyond into jigs, fixtures and commercial grade parts.
